

Certificate Program Testimonials From Current Participants

" I started this class as the only school employee, thinking to myself "What did I sign up for, this has nothing to do with me" Boy was I wrong!! It has been an extremely rewarding program! Not only am I learning about town finance, making lasting relationships and networking, but most importantly, I learned that public speaking is not as bad as I always thought it was. Understand your audience and be mindful. This is making me a stronger individual professionally AND personally! " - April Veracka, Finance Manager, SAU 70

" I was thrilled to see that the NHGFOA was offering a new Certificate Program geared towards government finance officials. The course curriculum covered areas of finance such as basic governmental accounting, internal controls, payroll, business communications, as well as an overview of the DRA Tax Rate Setting Portal and forms. I saw this as a great opportunity to learn and grow in my current role as Finance Director. The program cost was affordable and they offer scholarships. The program was well organized and I would recommend it to anyone in an entry or mid-level government finance role. " - Katie Phelps, Finance Director, Town of Boscawen

" The New Hampshire Government Accounting Certificate Program helps to gain the foundational understanding of accounting in a governmental environment, which is very different than a private business environment. This is an ideal program built in particular for finance personnel working in a New Hampshire municipality. I highly recommend this training because it was developed as an organized, practical and thoughtfully planned program. " - Carrie Klebe, Director of Finance, Coos County
